Steven,

My apologies. Jose took these photos you requested, and I forgot to forward them to you. As you can see from the date of the filenames, the photos were taken weeks ago.

lene

Subject: WGS� Sedimentation Basin restoration

Hi Lene,

From the weekly report that came in late yesterday from WMH, it seems they have weather that's good enough for them to be digging sediment out of the sedimentation basin and placing it into Cell E6; I hope the weather

continues to cooperate.

Please, no special trips, but next time one of your folks are out there and snap any pics, can you please send me a couple? I'm curious to see how it's going.

Plus, if you folks have any opinions on how it looks like they're progressing, I'd be glad to hear.

Not sure if I'll be back out, although I'd really like to see when they're nearly complete with that work.

Anyway, I think it's going to be interesting when they get close to uncovering the bottom and working to restore the drainage laterals etc., all in accordance with the plan we approved.

Many thanks!
